New Freedom, PA | Open to Relocation (South Carolina) | Portfolio Website: jeddelich.com

Frontend Developer specializing in React and Next.js, with hands-on experience building responsive, user-focused web applications. Proficient in TypeScript, Tailwind CSS, Firebase, and modern frontend tools, with experience developing API-driven features during an internship with Skinstric.ai. Built full-stack projects incorporating authentication, Stripe payments, and scalable UI patterns, with a focus on clean, intuitive interfaces and performance for superior UX.

Professional Experience

Skinstric AI (Intern)

Remote | March 2026

Frontend Software Engineer

- Developed 5 responsive pages for a real-time AI skin analysis platform using Next.js, accurately translating a design team's Figma frames into production-ready, animated UI across mobile, tablet, and desktop devices.
- Built 10+ scalable components using TailwindCSS and CSS Modules, ensuring consistent-styled future growth
- Engineered a complex form system with validation, error handling, and real-time user feedback states for UX
- Implemented camera capture/preview functionality and file upload, enabling image-based input processing.

Frontend Simplified. FES (Intern):

Remote | February 2026 - March 2026

Frontend Developer

- Built a responsive NFT marketplace spanning 4 pages with dynamic routing and API-driven content rendering.
- Successfully created, built, and pulled 8 approved branches, adding key features to the e-commerce platform.
- Integrated 6 API endpoints to fetch and display the NFT data, supporting real-time updates and scalability
- Developed 20+ reusable components to create a clean, modular, and maintainable UI architecture
- Implemented sorting functionality (price high–low, low–high, most liked) to enhance discovery and UX
- Optimized performance for key pages via lazy loading, dynamic-sized image requests, and skeleton states
- Reconfigured carousel library with custom logic to control reload rendering and minimize reflow

Projects (personal)

Netflix Clone: netflix.jeddelich.com/login | github.com/jeddelich/netflix-clone

Full-Stack Streaming Platform (Next.js, React, Typescript, TailwindCSS, Firebase, Stripe, JavaScript, Zustand)

- Built a fully responsive, account-based application hosted on Vercel, emulating clean, real-life UI/UX.
- Implemented secure authentication and subscription workflows using Firebase and Stripe, including protected routes and tested CRUD integration (free trial, plan management, cancellations).
- Integrated TMDB API across 8 endpoints to dynamically fetch and display 160+ movie titles, enabling scalable, category-based browsing and setting up for future genre-navigation features.
- Developed 15+ reusable components and scalable state management with Zustand, custom hooks, and contexts
- Enhanced user experience with trailer playback (React Player) and "My List" feature with full CRUD functionality
- Improved mobile performance by 28% through image optimization, lazy loading, and layout shift reduction (CLS)

Summarist: summarist.jeddelich.com | github.com/jeddelich/summarist

Full-Stack Subscription-Based Book Platform (Next.js, Typescript, Firebase (Auth + Firestore), Stripe, JavaScript)

- Built a full-stack application with auth, protected routes, and subscription-based access using Firebase and Stripe
- Developed a fully custom audio player with user controls and a time-format util enabling dynamic playback
- Implemented debounced search functionality and 5 API endpoints for efficient data fetching and rendering
- Designed a fully responsive UI with 20+ reusable components, skeleton loading states, and scalable architecture

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, Material UI, Styled Components, Zustand

Backend & APIs: Node.js, Firebase (Authentication, Firestore), REST APIs

Tools & Platforms: Git, GitHub, Vercel, Figma, Stripe, Lighthouse, ESLint, Prettier

Education:

Frontend Development Certificate | Frontend Simplified Institute (FES) | [View Certificate](#) December 2025 - April 2026

Bachelor of Science, Biblical Counseling | Bob Jones University | Minor in Business | 4.0 GPA August 2019 - May 2023

Other

Interests: FB marketplace, professional/recreational basketball
